

Bottom-Locking Slats

The Bottom-Locking Slat provides an economical and attractive way to enhance any chain link fence. Bunzl Extrusion is the largest manufacturer of Bottom-Locking Slats, which are marketed under the PDS® brand name. With over 25 years of experience extruding these products, and an exclusive, patented locking design, you are assured of the highest standards in quality - from the raw materials used in manufacturing to the finished product in your fence.

FEATURES

Design: Bottom-Locking Slats are flat tubular in shape, with reinforced “legs” inside for extra durability. Our patented locking channel provides a “snap-in” locking effect for security.

Fast & easy installation: Insert the locking channel horizontally through the bottom of the fence, then simply slide the vertical slats from the top of mesh down into the channel and they will automatically lock into place.

Standard heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon requests.

Slat length: 3¹/₂” shorter than overall height of fence.

Wind load and privacy factor: Approximately 75%.
