

Winged Slat®

Extra Privacy

When you need increased privacy, our Winged Slat® is the answer. With the proven quality and durability of our standard slats plus unique “wings” for extra screening and security, these slats are self-locking – no channels are needed!

FEATURES

Unique patented design: Includes a rigid, flat tubular body, with “legs” inside for extra support. Flexible and resilient wing portions are positioned on each side of the slat body. Serrations are added to the wings for easier installation and locking power.

Installation: Insert the slats vertically into the fence, from top to bottom – no tool is necessary. That’s it! The serrated wings grip the knuckles of the wire mesh, securing the slat in the fence.

Note: Additional time should be allowed for installation.

Standard heights: 4, 5, 6, 7, and 8 feet. For heights exceeding 7 feet, we recommend using (2) two half sizes (i.e. for 10 ft. fence use two 5 ft. slats) this will help during installation and will not lessen privacy.

Wind load and privacy factor: Approximately 90%.

Slat length: 2” shorter than overall height of fence.
